

Palm Conductive Gloves

The carbon fiber and nylon blend (ESD) structure provides effective static control. It is ideal for situations where touch sensitivity is important, especially when handling small parts. Suitable for environments where ESD control is essential. It offers good flexibility, ventilation, and minimizes perspiration. The glove ensures a secure grip and stable ESD performance.

Areas of Use:

It is well-suited for handling electronic devices, circuit boards, and components. It protects products from various issues or accidents caused by static electricity. Ideal for working with antistatic-treated surface semiconductors, microprocessors, and compact discs. Also used in the assembly of LSIs, VLSIs, semiconductors, computers, and precision instruments.

Technical Specifications:

Color: Grey

Coating Material: PU (Polyurethane)

Coating Color: White

Coating Area: Palm

Surface Resistance (Rs): $10^7-10^9 \Omega/\text{sq}$

Product Codes:

PCG-4710S Palm Conductive Gloves Small Size

PCG-4710M Palm Conductive Gloves Medium Size

PCG-4710L Palm Conductive Gloves Large Size

PCG-4710XL Palm Conductive Gloves Extra Large Size

Compatible with IEC 61340-5-1:2016
