

## Washable ESD Hair Cap, Blue/White Color

### Description:

The Washable Antistatic ESD Hair Cap is designed to provide effective ESD protection and contamination control in static-sensitive environments. This cap is ideal for use in electronics manufacturing, cleanrooms, and laboratories. Made from a blend of polyester, cotton, and conductive fibers, this hair cap ensures comfort and durability while preventing the buildup of static electricity.

### Features:

Color: Blue or White.

Can be used up to 50 washings.

Fabric: 53% polyester 45% cotton 2% conductive fibers.

### Benefits:

Provides effective ESD protection

Helps maintain contamination control in cleanrooms

Comfortable and breathable fabric for prolonged use

Durable construction for long-term use

Ensures compliance with ESD safety standards
